Expected Issues Coming Up

- In the last couple days before the final demo we are finishing up the last bits of the website functionality and styling the site. No immediate issues come to mind.

How is the project going so far?

The project has been going well. We were all able to meet outside of class for 3+ hours to get work done and update each other on progress. Core functionalities were added that were missing. We feel that we are on track and just cleaning up some remaining tasks before Wednesday's demo.
